

Office & Retail

Corporations, private developers, and professional service firms have unique needs that are specific to their brand attributes and corporate outlook. Our long-term experience in working with city officials and communities allows us to understand key regulations and urban design issues. Service and responsiveness is at the heart of KTU+A's listening approach. The results of this approach are focused solutions that create distinct identities, combining the architecture, interior design, ergonomics, graphic design, and landscape architecture into a balanced whole.

KTU+A is dedicated to designing innovative outdoor retail environments, public spaces, and amenities that are not only practical, but provide inspiration and distinction for our clients and their customers. These environments cater to the retail establishments and encourage the creation of unique customer experiences.

Planning + Landscape Architecture

Established in 1970, KTU+A is a San Diego-based planning and landscape architecture firm whose commitment to balancing human activities with the elements of nature has resulted in award-winning, creative, and sustainable projects throughout our community and the southwest.

Service to Our Clients

As our client, you can expect quality services that focus on your priorities and meet your deadlines and budgets. As your partner, our staff will provide planning and design solutions that are creative, clearly communicated, and well executed.

Our Approach

- Collaborate toward a common vision to attain uncommon results.
- Seek solutions that capture the context of the place, preserve existing resources, and integrate the values of the users.
- Shape the intersection of people and place.
- Implement in a sustainable and cost-effective manner.
- Evaluate and learn from our project experiences.

Knowledge and Experience We Bring to Your Project

The planning and design of a project requires an understanding of the regulations and requirements to protect the public's health, safety, and welfare; an understanding of the most innovative design technologies to meet current and future needs; an understanding of the needs and priorities of the users; and an understanding of the responsibilities of the client in terms of risk management, maintenance, future expansion opportunities, and costs. KTU+A takes these responsibilities seriously and strategizes with our clients and the consultant team to ensure the project meets and exceeds its goals and objectives.
